

Hide Price For Magento 2

User Guide

Our Magento 2 Hide Price module grants store/ business owners to hide product prices for guest visitors. With this module, a guest user can't check out the product without logging in. The Price and Add to Cart button are simply not displayed to guest users. They need to log-in to check prices or add the product to their cart. This empowers admins to control the direct price display of products and push visitors to mandatory log-in to the website/store which indirectly results in contacting the stores. Additionally, the competitors get restricted to see the prices directly.

Features

- Enable/ Disable module by admin.
- Easy configuration.
- Hide the PRICE of the products for guest users.
- Disable ADD TO CART button for guest users.
- No checkout of any product without logging in. \bigcirc
- Notice message to log-in to check product prices.
- Restrict direct sales.
- Restrict price comparison by competitors by concealing prices. \bigcirc

Installation Details

- \gg Download the zip file
- Extract it and put into <Magento-Directory>/app/code/
- Open CLI in Magento directory and Run Magento installation commands

CLI Commands

- → php bin/magento setup:upgrade
- php bin/magento setup:di:compile \rightarrow
