

Import Export CMS page For Magento 2

User Guide

Our module assists store/business owners to migrate their websites easily. With our import-export module, admins can easily import external CMS pages and also export their CMS pages to use for any other website. Admin can also export the details to keep as a backup. With this option, admins don't need to manually create or set pages every time. Rather they can easily import their old page from a backup CSV file.

Features

- Enable/Disable module by admin.
- Import external CMS pages via CSV file.
- Export external CMS pages via CSV file.
- Easy and quick import/export process for pages and blocks.
- Migrate the website to a new one with ease.
- Back up your current pages for a safer side.

Installation Details

- \gg Download the zip file
- Extract it and put into <Magento-Directory>/app/code/
- >> Open CLI in Magento directory and Run Magento installation commands.

CLI Commands

- → php bin/magento setup:upgrade
- → php bin/magento setup:di:compile
- → php bin/magento setup:static-content:deploy
- → php bin/magento cache:clean
- → php bin/magento cache:flush

Configuration And Customization

→ Configuration Login to the Admin Magento,
 Stores > Configuration > VDCSTORE> Import Export CMS

Ŵ
