

Product Category Filter For Magento 2

User Guide

Our Product Category Filter for Magento 2 enables the Admin to do multiple tasks with product categories under one page. Our module is packed with lots of features. It allows the Admin to update categories of multiple products together, so this savesAdmin's time and efforts to add products to the collection or update the existing ones. Admin can choose to see full category path or short category path. Details of products including category name and ID are shown in the product grid and the same can be updated from the actions drop-down menu.

Features

- Enable / disable module by Admin.
- Show full or short category path.
- Filter category by name or ID.
- Product category details in the Admin product grid.
- Option to Update category product grid. \bigcirc
- Add/remove categories by name or ID.
- Add/remove categories to batch or individual products.
- Convenient, Efficient, and Time-saving.
- Eases product category management.

Installation Details

- \gg Download the zip file
- Extract it and put into <Magento-Directory>/app/code/
- Open CLI in Magento directory and Run Magento installation commands

CLI Commands

- → php bin/magento setup:upgrade
- → php bin/magento setup:di:compile
