

Quick Cache Flush For Magneto 2

User Guide

Our quick cache flush For Magento 2 extension allows admin to automate the process of flushing cache storage and re-indexing. This saves the Admin's time from visiting cache management each time and manually clearing the cache storage and running the re-indexing commands in the console. This module allows the admin to Flush cache or re-index with just one click from any page of the admin dashboard.

Features

- Manual / Automatic cache memory flush.
- Flush cache from any page of the admin dashboard.
- Manual / Automatic re-index.
- Re-index from any page of the admin dashboard.
- Simple and quick setup.

Benefits

- You can select Automatic And Manual Quick Cache flush.
- Display the message when the cache flushes.
- Simple To Utilize.
- Compatible with all Magento Versions
- You can enable the Quick Re-Index automatically and manually.
- Time saving for admin.

How to Install

- Download the zip file
- Extract it and put into <Magento-Directory>/app/code/
- Open CLI in Magento directory and Run Magento installation commands

CLI Commands

- → php bin/magento setup:upgrade
- → php bin/magento setup:di:compile
- → php bin/magento setup:static content:deploy -f
- → php bin/magento cache:clean
