

Tier Price for Magento 2

User Guide

The Tier Price extension enables store owners to establish tier pricing strategies and give bigger discounts with higher volume purchases, hence building customer loyalty. Magento 2 Tier Price extension is a method for increasing sales and encouraging clients to buy more.

Tier Price Extension by Vdcstore enables Magento Merchants in displaying of Tier Prices in either tabular or label format. It also dynamically modifies the product pricing based on the amount selected on the product view page. When you select a table, it will display a table with the available quantity to purchase, and the price will be instantly displayed on the Magento 2 product view page.

Key features of Tier Price Approval Extension by Vdcstore :

- Automated tier pricing table
- Modifying Product pricing based on amount selected
- Prompts customers to buy more
- Improves Brand loyalty
- The Magento 2 Tier Prices extension allows you to configure custom marketing messages to display on the product page above the tier pricing to encourage users to check out the better offers available.

Installation Details

- Download the zip file
- Extract it and put into <Magento-Directory>/app/code/
- Open CLI in Magento directory and Run Magento installation commands
